

# Xu Hu

Senior Undergraduate @ [AHU](#) / Visiting Student @ [NCSU](#)

[Research Gate](#)

[Github](#)

[xhu25@ncsu.edu](mailto:xhu25@ncsu.edu) / [huxu896@gmail.com](mailto:huxu896@gmail.com)

<https://ise.ncsu.edu/fuzzy-neural/people/hu-han>

## Research Interest

- Data Augmentation & Generation
- Time Series Forecasting & Implementation
- Diffusion Model & Multi-Modal
- Brain Imaging/MRI & Mental Illness

## Reference

- Prof. [Xiaolei Fang](#) (NCSU)- Advisor of Research Intern [xfang8@ncsu.edu](mailto:xfang8@ncsu.edu)
- Prof. [Shu-Cherng Fang](#) (NCSU)- Advisor of Research Intern [fang@ncsu.edu](mailto:fang@ncsu.edu)
- Prof. [Vince D. Calhoun](#) (TRenDS;GSU&GAtch&Emory)- Collaborator [vcalhoun@gatech.edu](mailto:vcalhoun@gatech.edu)
- Prof. [Zhengyang Zhou](#) (USTC)- Advisor of the Summer Research [zzy0929@ustc.edu.cn](mailto:zzy0929@ustc.edu.cn)
- Prof. [Zhifu Tao](#) (AHU)- Undergraduate Tutor [jeff.tao@ahu.edu.cn](mailto:jeff.tao@ahu.edu.cn)

## Education Background

Anhui University (Project “211”), Hefei, China

2021-2025

- B.E.c Economic Statistics, Department of Big Data and Statistics
- GPA: 4.27/5.00 WES: TBD Major Rank: 1/103 (Top 0.95%)
- **Main Courses:** Mathematics Analysis 1&2 (90&94), Advanced Algebra(87), Probability&Mathematical Statistics(89), Operation Research(97), Statistics(94), Bayesian Statistics(100), R Programming(95), Python Programming(95), Data Mining(93), Applied Statistical Analysis(95), Statistical Forecasting&Decision(96), Econometrics(Intermediate) (96), Time Series(91)

## Publications

- [1] **Hu Xu**, Yu Jianwen, Xu Qin, Tao Zhifu, "Volatility information in high-frequency financial interval-valued time series: A direct modeling pattern". the Fluctuation and Noise Letters 2024, SCI: Q4.
- [2] ISBI (10/2024) in TRenDS
- [3] TBD (2024) in NCSU

## Research Experience

**ISE, Edward P. FITTS Department, North Carolina State University**

Raleigh, USA

*Student Intern, under the supervision of Prof. Shu-Cherng Fang and Prof. Xiaolei Fang* 08/2024–12/2024

### Adaptive Diffusion Models for Industrial Irregular Time Series Analysis

- Applied conditional diffusion models to sparse/irregular/missing time series data in industrial settings.
- Implemented domain adaptation, replacing Gaussian noise with Brownian motion-based noise to match real-world sensor data characteristics.

**Data Science and Analytic Thrust, HK University of Science and Technology**

Guangzhou, China

*Research Intern, under the supervision of Prof. Yuxuan Liang and Prof. Zhenyang Zhou* 07/2024–08/2024

### Spatial-Temporal Selective State Space(ST-Mamba) Model for Traffic Flow Prediction

- Be the first model without using graph modeling in the space-temporal model.

- Effectively capture the long-range dependency for traffic flow data.
- Employ the Mamba block to improve computational efficiency and accuracy.
- By ablation experiments, find some new conclusions of the SSM.

### TReNDS lab, ECE, GSU&Georgia Tech&Emory

Atlanta, USA

Research Intern, under the supervision of Prof. Vince D. Calhoun

05/2024–07/2024

#### Functional-to-structural MRI Image Translation based on Conditional Latent Diffusion: Biomarker Identification for Schizophrenia

- Utilizing an improved Diffusion Transformer (DiT) to achieve reverse generation from Functional Network Connectivity (FNC) to Gray Matter (GM).
- Introducing FNC matrix as a condition in the DiT model to guide the GM generation process.
- Revealing Subject-specific Biomarkers for Schizophrenia by Functional and Structural MRI Data.

### Department of Big Data and Statistics, Anhui University

Hefei, China

Undergraduate's Research Project, under the supervision of Prof. Zhifu Tao

03/2023-09/2023

#### Volatility Information in High-Frequency Financial Interval-Valued Time Series: A Direct Modeling Pattern

- Developed a novel VAR-NN forecasting model combining Vector Auto-regressive process, volatility information, and neural networks.
- Introduced four types of interval-valued data volatility information for more accurate predictions.
- Outperformed traditional methods in forecasting high-frequency financial data.

### College of Computing and Data Science, NTU

Singapore

AI Summer School &amp; Award Best Project &amp; Award Excellence Leadership

07/2023-08/2023

#### Location-based Demand Prediction & Resource Optimization System for California Bike-Sharing

- Real-time prediction and optimization of dynamic demand for bike-sharing systems
- Maximizing resource allocation efficiency and enhancing user experience
- Data-driven decision support for smart urban transport management using multidimensional data

## Competition Awards

### 2023 ICM - American Undergraduate Mathematical Modeling Competition - Finalist

02/2023

Propose a solution about the network science and operation research

#### Award Global Grand Prize Nomination (top 0.17%)

- Applied Canonical Correlation Analysis to the United Nations' 17 Sustainable Development Goals.
- Use some advanced econometrics methods to analyse the factors influencing the progress.
- Utilized an LSTM to predict achievable goals over the next decade.
- Concluded with a sensitivity analysis, affirming the robustness of the model.

## Honorary & Service & Leadership

### • The Student Assistant of the President in Anhui University

The first junior undergraduate selected

06/2022-06/2023

### • The Member of a Startup Company "Empower Planet"

Presentation for investment &amp; Field visit to agricultural aid bases

04/2023-08/2023

- National Scholarship, Outstanding Student Award, Academic Excellence Award etc.

## Skills

**Professional Qualification:** ACCA (2022): Pass the exam of BA, MA, FA; BEC Medium pass

**Computer Skills:** Python, R, PyTorch, LaTeX

**Language:** IELTS 7(6.5) ; GRE: TBD
